EX PARTE OR LATE FILED

Federal Communications Commission  
Washington, D.C. 20554

MAY 20 1996

RECEIVED  
MAY 23 1996  
FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF SECRETARY

The Honorable Fred Thompson  
United States Senate  
523 Dirksen Senate Office Building  
Washington, D.C. 20510

Dear Senator Thompson:

Thank you for your letter of April 30, 1996, on behalf of your constituent, Claud Chellstorp, regarding the Commission's decision to freeze acceptance of paging applications. Mr. Chellstorp expresses concern that the suspension of processing of paging applications will adversely affect small businesses that provide paging services.

The Commission is currently conducting a rulemaking proceeding that proposes to transition from licensing paging frequencies on a transmitter-by-transmitter basis to a geographic licensing approach, using auctions to award licenses where there are mutually exclusive applications. In conjunction with that proceeding, the Commission initially froze processing of applications for paging frequencies. On April 23, 1996, the Commission released a First Report and Order in **WT Docket 96-18** and **PP Docket 93-253**, which adopted interim measures governing the licensing of paging systems and partially lifted the interim freeze for incumbent paging licensees. For your convenience and information, enclosed is a copy of the Press Release concerning the First Report and Order, which includes a summary of the principal decisions made. Specifically, small and medium sized incumbent paging companies will be permitted to expand their service areas if the proposed new site is within 65 kilometers (40 miles) of an authorized and operating site. These interim rules will remain in effect until the Commission adopts final rules in the paging proceeding.

Thank you for your inquiry.

Sincerely,

David L. Furth  
Chief, Commercial Wireless Division  
Wireless Telecommunications Bureau

Ms. Judith L. Harris  
Director  
Office of Legislative and Intergovernmental Affairs  
Federal Communications Commission  
Room 808  
Washington, DC 20554

Dear Ms. Harris:

I have enclosed a letter from a constituent of mine, Mr. Claud Chellstorp, who is concerned about the Federal Communications Commission's (FCC) decision to freeze new applications for paging licenses.

He believes that the freeze has a negative impact not only on many paging companies' efforts for expansion and modification, but also on the consumer. I ask that you consider his request for lifting the paging freeze as this issue is addressed. Furthermore, I was hoping you could respond to me and provide me with some information about the FCC's rationale for the freeze and any efforts that might be made to lift the freeze.

Thank you for your continued assistance.

Sincerely,

Fred Thompson  
United States Senator

Washington, D. C. 20510

Dear Senator Thompson:

I and other concerned colleagues in the paging industry have formed a Coalition for a Competitive Paging Industry to contest a freeze on paging applications imposed February 8, 1996 by the Federal Communications Commission. On February 28, 1996, we filed an Emergency Petition with the FCC for immediate withdrawal of the freeze.

We believe it is critical that the FCC understand the impact of the freeze on the highly competitive and previously thriving paging industry. For paging companies to be competitive, they must meet customer demands by expanding or modifying their existing systems. Because of the freeze, most paging company's plans for expansion or modification have come to a halt. However, nationwide carriers are exempted from the freeze which allows them to proceed forward and expand. Each additional day in which the freeze lasts means that we and other paging companies are suffering severe economic harm and that the public is deprived of new and expanded paging services.

I would very much appreciate your support in our efforts to persuade the FCC to lift its freeze on paging applications.

Thank you for your assistance.

Sincerely yours,

Claud A. Chellstorp
